

Natural Gas Safety and Services Crossword Puzzle

Across

3. Planning to move? Contact us at least _____ before your moving day to ensure natural gas service will be working at your new home when you need it.
5. What's that smell? The strong odor, kind of like rotten eggs, is actually the chemical _____ which is added to natural gas for your safety. Recognizing this smell can help you detect a natural gas leak.
7. When cooking with gas, match the pot or pan size with a similar-sized burner. It not only takes less time to heat, but also uses heat more _____.
9. A _____-colored flame on your natural gas range means your stovetop is working properly.

Down

1. To prevent _____ (CO) poisoning, install and maintain CO alarms within 15 feet of sleeping areas.
2. Our corporate contributions focus on _____ and neighborhood development. Many of our contributions also include volunteering by our dedicated staff — many of whom live in the communities we serve.
4. Our _____ program provides heating grants to limited and fixed-income households.
6. Always _____ before beginning any digging project so the underground utility lines can be marked.
8. We work hard to reliably deliver _____ to your home so you can do the things you love — from taking warm showers to cooking your favorite meal.
